Archaeopteryx

Archaeopteryx means "ancient wing" and is sometimes called the "first bird." It was a two-legged carnivorous dinosaur with hollow bones, flight feathers, and a larger brain that allowed it to fly. Scientists believe it did not go extinct with the other dinosaurs and that today's birds evolved from it.

a c-start, touch, and down

Where in the alphabet are **A** and **a**?

Circle capital **A**. **A B C D E F G H I J K L M N O P Q R S T U V W X Y Z**

Circle lowercase **a**. **a b c d e f g h i j k l m n o p q r s t u v w x y z**
